***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: None of the references cited or the art searched disclose or teach alone or in combination the method of aggregating opinions by consolidating a plurality of expressed opinions as discrete probability distributions, and generating an aggregate opinion as a single point probability distribution by minimizing a sum of weighted divergences between a plurality of these discrete probability distributions, where the minimization of the divergence function process is explained precisely in the specification from line 20 on page 9 to line 10 on page 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Relevant Prior Art***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hey (4870579) discloses a system and method of for predicting subjective reactions to sampled items, which includes a weighing step to consider large differences. Probabilities of differences of opinions are also compared in an embodiment.

Miles (6125340) discloses a system for determining with a certain probability whether given evidence results in a conclusion. After software polls a user, probability theory is used to calculate the probability that each item of evidence individually could prove the premise based upon the user's input. The methodology utilizes statistical analysis and histograms for comparison basis.

Draber (7050935) discloses a method for assessing the reliability of technical systems, where upper, lower, and subjective expert opinions are provided in the case of unknown failure rates estimates mean values.

Wallsten (Journal of Management Science) discloses a method for comparing numerical and verbal probability judgments, which includes the methodology to quantify both for the purposes of comparison.
